The graph illustrates the cumulative survival over time for three different groups labeled as Group 1, Group 2, and Group 3. The x-axis represents time in months, ranging from 0 to 60, and the y-axis represents cumulative survival, ranging from 0 to 1. Group 2 shows the highest survival rate, maintaining a cumulative survival of 1 throughout the entire time period. Group 1 has a lower survival rate, showing a decrease in cumulative survival over time. Group 3 has the lowest survival rate, with a significant drop in cumulative survival after the initial months.
